

BENEFITING FROM CTD'S EXPERTISE IN THE FIELDS OF CIVIL SECURITY AND THE MAINTENANCE OF GREEN SPACES, THE TRIOCEROS OFFERS AN INNOVATIVE COMBINATION OF FIRE-FIGHTING, DISINFECTION, WATERING, CLEANING AND DRYING UP

FIRE-FIGHTING

Flow: 21 L/min
Pressure: 200 Bar
Hose lenght: 40 meters
Product: Wetting/Foaming agent

Trioceros is an effective fire-fighting method accessible to everyone.

The contribution of foaming wetting agent combined with a light and handy 3-position branch (extinguishing foam, doped water, sprayed water) allows rapid extinction of small and medium fires that may occur in your installations.

HP WASHING

Flow: 21 L/min
Pressure: 200 Bar
Hose lenght: 40 meters
Product: Detergent

Trioceros is a high pressure washer with high washing performance. The incorporation of

the detergent associated with the 3-position branch makes it possible to create an active foam on the support to be cleaned. Washing at high flow and pressure, combined with the action of the foam, thoroughly cleans all types of media.

4 IN 1 SYSTEM

Possibility of supplying the TRIOCEROS :

- Mounted on skid (see photo)
- In unassembled kit (without water and additive tank or skid)

+ MOBILE

Adaptable on all supports and all types of vehicles.

+ USABLE ALL YEAR ROUND

A solution adapted to each season.

+ VERSATILE

One device for all uses.

+ OTHERS FUNCTIONS

Pipe cleaning, watering, misting, pest control...

+ SIMPLICITY

Easy switching between functions.

+ EFFICIENT

Combination of high flow and high pressure.

DISINFECTION

Flow: 21 L/min
Pressure: 200 Bar
Hose lenght: 40 meters
Product: Disinfectant

Trioceros is a high pressure washer with disinfection performance. The incorporation of

the disinfectant associated with the 3-position branch makes it possible to create an active foam on the equipment to be disinfected. Washing at high flow and pressure, combined with the action of the foam, thoroughly disinfects all types of media.

Non contractual photo

DRYING

Suction flow: 250 L/min
Hose lenght: 5 meters

The additional mud vacuum cleaner is the ideal additional

equipment for all drying, water transfer work but also in the event of a flood. The vacuum cleaner connected to the high pressure pump makes it possible to evacuate the charged water effortlessly thanks to an innovative venturi system.
